

C-14 DEIONISER SYSTEM

PRODUCE YOUR OWN PURE WATER FOR ARTIFICIAL INSEMINATION

A simple bench - top colour-change de-ioniser cartridge for producing pure water for making diluent. Take water from your normal supply and produce water with a tds* of 2-20 micro Siemens at a rate of up to 60 litres per hour. It will produce approx 110 litres of water in this range from source water with 300 tds (a reasonable average in UK)

A transparent outer housing sits in a special mount on the table-top, and is connected to the water supply by a straightforward push-fit plastic tube.

The inner replaceable cartridge changes colour as it becomes spent, so it is easy to see when it needs changing.

Supplied with a special wrench to make changing the cartridge easy.

*total dissolved solids
